## ANIMATOR

### About Me

I'm a Vancouver-based animator originally from South Carolina. Growing up I loved to draw and be creative, leading me to take every art class available to me. Seeing the making of Jurassic Park at age 12 sparked my enthusiasm for animation and visual effects, a passion which led me to earn a degree in computer animation from the Atlanta College of Art. Since my first feature film job in 2010, the animation industry has led me to Vancouver, Canada where I have worked for some of the world's leading visual effects studios. I love the challenge of bringing amazing visuals to life and I'd love the opportunity to work for you too on your next cool project.
